Non-GMO

INGREDIENTS

Water, organic coconut oil, stearic acid, shea butter, emulsifying wax (cetyl alcohol, stearyl alcohol, polysorbate 60), methylsulfonylmethane (MSM), 4% menthol (topical analgesic), 0.025% capsaicin (topical analgesic) broad spectrum hemp extract (CBD, CBG, CBN, CBDV) (aerial parts), phenoxyethanol, xanthan gum, tetrasodium glutamate diacetate

SUGGESTED USE

Apply a small amount of pain relief cream over the desired area. Massage thoroughly and repeat as needed.

POWERFUL PAIN RELIEF W/ CBD, CBG, MENTHOL & CAPSAICIN

OUR NEW AND IMPROVED TOPICAL!

PureKana Pain Relief Topical Ointment features 600mg of CBD in combination with 120mg CBG plus menthol and capsaicin for powerful relief on sore, aching muscles and painful joints. Our advanced topical formula provides relief for athletes after the toughest training sessions, and/or for individuals dealing with everyday muscle and joint pain.

Quality Moisturization and Fortifying Effects!

Topicals are applied directly to the desired area so that the CBD can work directly where it's needed most. Ingesting CBD products orally causes CBD and other compounds to enter into the digestive system, because the body has to process these types of products, it may take awhile before effects are experienced. With CBD topicals, the compound (and other hemp-derived phytochemicals) are applied directly the skin, allowing them to target specific areas and provide the effects you're looking for.

* Less than 0.3% THC

CBD TOPICAL CREAM: WHAT'S THE BENEFIT OF THE CBG, MENTHOL, & CAPSAICIN?

As active topical analgesic compounds, menthol and capsaicin may provide effective supplementary relief when used in combination with CBD and CBG. A quality CBD topical cream provides the advantage of being able to apply the active hemp extract directly to the site that you need it. This is particularly useful for application to common areas of discomfort, as the advanced formula compound will spread out evenly over the entire site of application.

WHAT'S THE DIFFERENCE BETWEEN A CBD TOPICAL SALVE AND OTHER PUREKANA PRODUCTS?

Before you decide to buy topical CBD oil, it's important to understand the difference between the various products that we sell here at PureKana, as each individual product has been designed with specific uses in mind.

The topical ointment is one of our most common products for direct application. Feel free to use the product topically as you choose, applying as much or as little as necessary. Standard CBD oil drops can take quite some time to reach desired areas (since they have to enter into the digestive system), but with topical creams, you're applying the hemp extract and accompanying phytochemicals directly, letting the active cannabidiol diffuse across the dermal layers and to the site where you need it most.

Also, we've made sure to use moisturizing ingredients in order to replenish and beautify the skin, all while providing the body with the amazing effects of hemp extract.
